## **Trustive expands its coverage in North America with the addition of HarborLink Network Wi-Fi locations**

**Customers traveling in the U.S can seamlessly connect with their Trustive accounts at participating BP fuel & convenience stores and Buffalo Wild Wings restaurants**

**London, England (UK) and Dayton, OH (USA) – January 17, 2011** - Trustive, a leading international WiFi access provider is very proud to announce a significant expansion in their WiFi coverage across the United States, thanks to a new partnership agreement with HarborLink Network, Ltd. HarborLink Network's hotspot footprint is anticipated to grow to several thousand premium WiFi locations this year, with coverage in many of the top metropolitan areas in the U.S., as well as many rural locations. HarborLink Network serves many top brands where Trustive customers can get online, including Buffalo Wild Wings and Skyline Chili restaurants, BP fuel & convenience stores, and several other major restaurant chains, retail locations, universities, municipal WiFi locations and convention centers.

Additionally, HarborLink has entered into an affiliate agreement with Trustive allowing walk-up customers to sign-up for Trustive subscriptions when connecting to the landing pages at HarborLink locations. For a complete directory of Trustive's WiFi Coverage in 130 countries, please visit <http://www.trustive.com/hotspots/>

Christian VanGhelder, Managing Director of Trustive confirms that "Trustive understands the need to stay connected when travelling and more importantly to use WiFi access wherever possible because it is far cheaper, faster and easier than 3G and so this latest expansion in Trustive's coverage will of course offer even more locations for Trustive customers to stay connected when traveling in the United States."

"By partnering with Trustive, HarborLink continues to build upon our neutral roaming strategy for enabling easy, seamless Wi-Fi access at our hotspot locations in North America for the top domestic and international Wi-Fi aggregators, ISPs, mobile operators and consumer device companies worldwide." said Robert Brown, HarborLink's Global Vice President of Sales & Marketing. "Trustive is one of the biggest players in our space and we are excited to be working with them."

Trustive customers will be able to access HarborLink Locations within 30 days including Buffalo Wild Wings and Skyline Chili restaurants, BP fuel & convenience stores, and many other locations across the U.S. For more information regarding Trustive's products and services, please visit [www.trustive.com](http://www.trustive.com).

### [About Trustive](#)

Trustive already gives travelers comprehensive WiFi coverage by combining the hotspot locations of more than 70+ leading WiFi operators into one unified, global network of 180,000+ WiFi hotspots in 130 countries (including more than 750+ airports internationally) and allowing Trustive customers access to these locations through a single click (single username and password plus a range of WiFi clients for both computers and smartphones that automate the log in process). For more information about Trustive's range of mobile internet access services or to consult Trustive's online coverage directory, please visit [www.trustive.com](http://www.trustive.com).

### [About HarborLink Network, Ltd.](#)

HarborLink Network, Ltd. is a leading provider of Internet hotspot access, integration and network management services in North America. HarborLink's extensive Wi-Fi network is deployed in some of the most well known, heavily frequented venues in North America, providing more places than ever for customers to get online when away from their home or office.
